The President, SAMUEL G. DIXON, M. D., in the Chair.

Thirty-five persons present.

Premolars and Form of the Skull.—DR. HARRISON ALLEN proposed to call the teeth back of the canines in Man the premolars, since they are followed in direct infra-position by the teeth of the same name in the permanent set: thus the deciduous series do not possess molars.

He also spoke of the effects of diseased action on the form of the skull. Many of the so-called types were of late origin, due to various phases of malnutrition and were not of much systemic significance.

The following were ordered to be printed :—
